## Target market

### Customer description

This describes customers in the target market

### Objectives and needs

- a person who may seek to electronically transfer funds from their eligible AMP Bank account to another Australian bank account, where the funds need to be received in the other bank account on the same day.

### Financial situation

- a person who will have enough money held in their AMP Bank account to make the funds transfer and to pay any bank fees as and when such fees become due and payable.

### Product description

This describes the product

- A non-cash payment facility offered to AMP Bank customers who hold an eligible account. It allows them to make a 'same day' real-time gross settlement transfer of funds from their AMP Bank account to an account at another Australian bank, rather than making the payment by a direct credit (overnight) payment.
- In general, it is only available to customers who meet standard eligibility criteria.

### Appropriateness statement

This explains that the product is consistent with the likely objectives, financial situation and needs of the target market

AMP Bank has considered that the product is appropriate for the target market on the basis that the key attributes of the product listed in this determination directly address the objectives, financial situation and needs of customers in the target market as described in this determination.
