

AMP Bank Broker Platform

Our Third-Party Partners – Data Integrations

 Type	 What does it do?	 Service Provider	 Obtained by
Consent Loanapp	Requests applicants consent for the application and covers ID, privacy and the permission to complete digital income verification. This replaces the need for a signed application form.	Simpology	System triggered once we have minimum customer data and broker proceeds to complete the Financial Section in Loanapp. A pop up will appear before, allowing you to verify details before sending. Applicant receives email, accesses Consent link and logs in to digitally complete Consent.
Verification of Identity (VOI) Loanapp	Identity checked on documents and applicant selfie via mobile device. This checks that the applicant is a real person. This can be initiated from Loanapp or retrieved by broker. If initiated from Loanapp, once VOI is completed, Green ID will automatically run to check the documents provided are real government issued identification with the DVS and other background sources.	IDverse greenID (GBG)	Manually triggered. Applicant receives an SMS, digitally completes via their mobile device. Once VOI completed, automatically runs when customer completes VOI.
ID document verification Loanapp	If the Verification of Identity (VOI) widget was used to retrieve a previously completed VOI, this section will run to complete Green ID and will automatically run to check the documents provided are real government issued identification with the DVS and other background sources.	greenID (GBG)	Completed automatically when Broker provides previously completed VOI ID number.

 Type	 What does it do?	 Service Provider	 Obtained by
Payroll Income Verification Loanapp	Provides income information direct from payroll providers. Income used from this service will be verified PAYG income and will not require further supporting documentation.	Equifax Verification Exchange	System triggered once VOI is completed and verified. It will only be successful if data is available for PAYG applicants.
Income Verified via uploaded documents Loanapp	Provides income information from income documents uploaded. Income used from this service will be verified income and will not require further supporting documentation.	Fortiro Accelerate	Manually triggered, only if no data available on Income digitally verified via payroll widget (Equifax Verification Exchange).
Rental income verification Loanapp	Verifies declared rental income by comparing it to data from CoreLogic's Rental AVM system.	CoreLogic Rental AVM	Automatically triggered for each property where rental income is received.
Request or retrieve valuation Loanapp and Omni	Property valuation can be ordered or retrieved (if ordered via Property Hub prior).	CoreLogic	Broker manually triggered or triggered by Credit post submission.
